

Creative Pipe, Inc. now offers a full line of fiberglass site appointments including benches, tables, receptacles, recycling receptacles, planters and ash urns. Available in a variety of different finishes and colors, this line of fiberglass site furnishings is the perfect compliment to our steel site amenities. These products are perfect both indoors and out and they compliment both residential settings and commercial settings such as shopping malls, airports, corporate campuses, office buildings, hotels, and universities. Their long lasting fiberglass construction is virtually corrosion proof, and the smooth or textured polyester gel coat finish works equally well in either casual or formal interior or exterior environments.

**STANDARD MATERIALS:** Multiple layers of manually applied fiberglass reinforced thermosetting polyester resin permanently fused to a solid ultra-violet stabilized pigmented polyester gel-coat. The gel coat shall be uniform in color and texture and is approximately 15 mils thick. This non-porous gel-coat resists bacteria growth and is impervious to weather, harsh chemicals, and ultra-violet rays. All units are manufactured using a seamless molding process. Surface shall be stain, fade and chip resistant, and shall receive our proprietary triple seal waterproofing system.

**FINISHES:**

**Semi-gloss (Standard):** Smooth polished surface (22 standard colors)

**Matte (Optional):** Smooth, slate like surface (available in all the standard colors)

**Sand Texture (Optional):** Concrete simulated surface, superb aging and wear resistant properties (available in all the standard colors)

**Poly-tex (Optional):** Slightly textured, multi-color, simulated natural stone surface ideal for heavy traffic areas with Class 1 and Class A fire rating

**Granite (Optional):** Smooth polished granite simulated surface meeting all the tests required for the cultured marble industry and Corian™ products; UV stabilized, fire retardant and stain resistant.

**STANDARD FEATURES:**

- Smooth polyester gel-coat finish
- Black recessed base on all return lip planters and two piece trash receptacles
- 3"x3" recessed base on larger units and 1.5"x1.5" recessed base on all others
- Planters that are compatible with standard grow pots
- Waterproofing consisting of our proprietary triple seal system.

**OPTIONS:**

- Applied finish textures: matte; sand; granite or poly-tex
- Fire retardant resin
- Same color bases versus the standard black base
- Custom gel-coat colors
- Concealed casters
- False bottoms
- Intermediate heights on all standard products
- Drain holes
- Planter saucers available in matching colors and finishes.

**NOTE:** THE PRODUCTS SHOWN ARE BUT A SMALL SAMPLING OF THE STANDARD LINE OF FIBERGLASS PRODUCTS AVAILABLE. WE CAN ALSO FABRICATE CUSTOM DESIGNS AT THE CUSTOMER'S REQUEST
