

Lightning Bolt™ Bicycle Rack -LR Series™: Patented

- The exciting patented Lightning Bolt™ (LR Series) Bicycle Racks by Creative Pipe Inc. were designed to solve many of the problems inherent to bicycle racks on the market today.
- Single and double sided models (double sided models carry an "LR-XP" designation).
 - Carefully engineered design promotes obvious, intuitive and secure parking and locking.
 - Low profile, sleek and aerodynamic design makes the racks virtually invisible when loaded with bikes and aesthetically pleasing when empty or partially filled.
 - Locking post and integral wheel well provides 3-point support and keeps the bikes upright and aligned while eliminating handlebar interference.
 - Rear and front wheel stops prevent bikes from extending into aisles and allow parking of bikes on moderate grades.
 - Locking zone provides optimal locking of tire and frame using a "U" lock, cable or chain lock.
 - Slanted locking post for proper locking of various sized wheels.
 - Front-wheel-in (standard) or rear-wheel-in parking with secure locking of both wheel and frame.
 - Perpendicular and diagonal models to support normal and reduced depth sites.
 - LR Racks can be used in straight, circular or "s" shaped configurations.
 - Extra heavy .188 wall square tubing with 3/4" solid round bar loops. (See next page for advantages of square tubing.)
 - Flat bar runners are constructed from 4" x 3/8" flat bar.
 - When loaded with bikes, allow 6' for LR-P, 4' for LR-D and 10' for LR-XP racks.
 - LR Series racks stand 27" tall.

FINISH OPTIONS: Same as Thunderbolt Rack, see page 37.

MODEL #	DIM" A"
LR-P-2	44.50"
LR-P-3	67.00"
LR-P-4	89.50"
LR-P-5	112.00"

MODEL #	DIM" A"
LR-XP-2	27.00"
LR-XP-4	49.50"
LR-XP-6	72.00"
LR-XP-8	94.50"

MODEL #	DIM" A"
LR-D-2	59.50"
LR-D-3	89.50"
LR-D-4	119.50"

Campus Rack™ (CR-2)

- The CR-2 offers many of the advantages and characteristics of the LR Series Racks in a double bike capacity, perpendicular configuration.
- Constructed from 1 3/8" O.D. Schedule 40 steel pipe with 4" x 3/8" steel flat bar runners.
- Dimensions: 30" H x 30"D x 32.5"W.
- Square tubing also available.

FINISH OPTIONS: Same as Thunderbolt Rack, see page 37.

MaverRack™ - MV Series Bicycle Rack

The patent pending MaverRack offers the same advantages as the Lightning Bolt Rack, and functions in exactly the same manner. This rack also has the added advantage of being able to ship broken down thereby decreasing freight charges. The base runner is heavy-duty 4" channel, and the uprights are fabricated from stout 3/8" laser cut steel plate to guarantee integrity and security. The following three different locking slot designs are available: 1. universal bicycle parking symbol design (shown). 2. bicycle design 3. standard design.

FINISH OPTIONS: Same as Thunderbolt Rack, see page 37.

NOTE: MAVERRACK AND LIGHTNING BOLT RACKS SHARE IDENTICAL DIMENSIONS AND LAYOUTS. DESIGNATE : "MV-P-", "MV-D-" OR "MV-XP-" FOR MAVERRACKS.
